**Wheeler Winston Dixon, Gwendolyn Audrey Foster : A Short History of Film** before purchasing it in order to gage whether or not it would be worth my time, and all praised A Short History of Film:

1 of 1 people found the following review helpful. great book for overall filmBy justinThis book is amazing for an Overall History of Film and definitely great to see what kind of films were great in their times and the effects of history that had on the movies. Their are many films in this book and i suggest watching them all to get inspired to create your own movies because the movie industry portrayed in this book is much better than the industry we have now0 of 0 people found the following review helpful. prompt and accurateBy Christian FuentesArrived as described and in record time. I would do business with this seller again. And I'm learning all about cinema now which is great since I have three exams to study for.0 of 0 people found the following review helpful. Five StarsBy yongkwan

kimvery good.

The history of international cinema is now available in a concise, conveniently sized, and affordable volume. Succinct yet comprehensive, *A Short History of Film* provides an accessible overview of the major movements, directors, studios, and genres from the 1880s to the present. More than 250 rare stills and illustrations accompany the text, bringing readers face to face with many of the key players and films that have marked the industry. Beginning with precursors of what we call moving pictures, Wheeler Winston Dixon and Gwendolyn Audrey Foster lead a fast-paced tour through the invention of the kinetoscope, the introduction of sound and color between the two world wars, and ultimately the computer generated imagery of the present day. They detail significant periods in world cinema, including the early major industries in Europe, the dominance of the Hollywood studio system in the 1930s and 1940s, and the French New Wave of the 1960s. Special attention is also given to small independent efforts in developing nations and the corresponding more personal independent film movement that briefly flourished in the United States, the significant filmmakers of all nations, censorship and regulation and how they have affected production everywhere, and a wide range of studios and genres. Along the way, the authors take great care to incorporate the stories of women and other minority filmmakers who have often been overlooked in other texts. Compact and easily readable, this is the best one-stop source for the history of world film available to students, teachers, and general audiences alike.
