By marvharpsI just received my flash cards and my first thought was "man, these things are huge," then I realized they are designed for a music teacher to teach a class with. I bought them because I am teaching myself to read music so the biggest draw back for me is that the "answer" on the back corner is just a picture of what is on the front cover, not the note timing and letter. I am not sure if I will go through and add that information or not. The cards are very nice and well made, but if I remember correctly, even the math cards we used when I was in elementary school had the answer in the corner, not just a picture of the problem from the front. This makes it less practical to have someone help me with my self teaching since they would probably have less music knowledge than I do (which is not much). 0 of 0 people found the following review helpful. I actually wish there were a few more complicated rhythms ... By SoprannaI actually wish there were a few more complicated rhythms here, or maybe some longer exercises, but these work very well for what they are. 4 of 4 people found the following review helpful. Not what I expected... By KJKThe product description is very much incomplete. These flash 'cards' are actually quite large, much bigger than index cards, which is typically the size I encounter for most flashcards. I'm also turned off by how flimsy the paper is. Additionally, the flashcards are more geared toward educators or teachers in a school classroom and are less than desirable for personal use. I teach privately and have new students use flashcards to get acquainted with reading the staff. With these, however, the answer to the note name is not found on the opposite side; instead is another note-to-be-named. So, if I have a student use these for their daily private study, it is not the most efficient or useful method. On another note, these cards are a

part of a whole system - meaning that you'd have to be several other sets of cards and even CDs to actually get a thorough approach (and thus have to spend a lot more money). Again, this is far from what I expected them to be - simple, honest, complete, flashcards.

This exciting Flash Card set includes 48 rhythm flash cards, containing 96 rhythm patterns. It is organized into 4 progressive sets and may be used with any beginning music theory course. Correlated with Essentials of Music Theory, Book 1, and Volume 1 of the Computer Software.
