By Ken Thomas
This vocabulary book of simple English to Arabic and Arabic to English is useful for many reasons. It was written in the last half of the 19th century so it gives a perspective of language usage that is galvanized and not effected by current dialect and linguistic trends. The Romanization of the words from Arabic to English seems to be proper and phonetically correct, even by today's standards. It remains to be seen what modern Arabic speakers think of the dated language but for those interested in a window into past speaking styles, dialects and mannerisms it is quite a treasure. As noted, some of the words are colloquial and may be extinct in current practice since trends come and go. And since this book is over 100 years old some of those social and dialectic words may have gone into the bin of antiquity. At the same time the static position of this book gives us a sense of what more authentic and localized Arabic language must have been before the influx of Westerners.
