Michael Schillmeier : Rethinking Disability: Bodies, Senses, and Things (Routledge Studies in Science, Technology and Society) before purchasing it in order to gage whether or not it would be worth my time, and all praised Rethinking Disability: Bodies, Senses, and Things (Routledge Studies in Science, Technology and Society):

This text is a critical and empirically-based introduction to disability studies. It offers a comprehensive, book-length analysis of disability through the lens of Science and Technology Studies (STS), and presents a practice-oriented discussion of how bodies, senses and things are linked in everyday life and configure "enabling" and "disabling" scenarios. Relevant to a broad spectrum of medical practitioners and practicing social service workers, the book will also be essential reading in the fields of disability studies, sociology of the body/senses, medical sociology and STS.

About the Author Michael Schillmeier is Senior Lecturer in Sociology at Ludwig-Maximilians University of Munich.
