**Jeanne Fahnestock : Rhetorical Style: The Uses of Language in Persuasion** before purchasing it in order to gage whether or not it would be worth my time, and all praised Rhetorical Style: The Uses of Language in Persuasion:

0 of 0 people found the following review helpful. Five StarsBy CustomerExcellentlly organized and informative book.0 of 0 people found the following review helpful. Five StarsBy Elizabeth MillerA great resource.10 of 10 people found the following review helpful. Brilliant!By Talula TabboulehFahnestock's book focuses on how writers achieve effects from their choices of words, phrases, and sentence patterns. I find it very easy to read, but it isn't a manual that teaches people how to write so much as a manual that gives insight into how one might analyze small portions of text

to understand written style better: it is amply illustrated by political speeches, news articles, and other texts so that every point is explained and at least one exemplar analyzed to show how seemingly small changes in style can have important changes in meaning and persuasive effect on an audience. In short, it is a step towards learning how to analyze in detail how persuasion is accomplished through language, which would help you write, but it isn't a manual for writing. People who teach writing or edit would benefit from studying this book. If you are thinking of an MA or PhD in any communication field (written or oral or combined), this book is an excellent introduction by an outstanding professor. People who teach any subject and ask students to analyze language related to that subject would probably also benefit from it. And anyone who is simply interested in language and persuasion will find this a lucid guide to understanding how stylistic choices impact meaning/audience reception. It will definitely give you a different perspective on the daily communications that come your way.

A comprehensive guide to the language of argument, *Rhetorical Style* offers a renewed appreciation of the persuasive power of the English language. Drawing on key texts from the rhetorical tradition, as well as on newer approaches from linguistics and literary stylistics, Fahnestock demonstrates how word choice, sentence form, and passage construction can combine to create effective spoken and written arguments. With examples from political speeches, non-fiction works, and newspaper reports, *Rhetorical Style* surveys the arguer's options at the word, sentence, interactive, and passage levels, and illustrates the enduring usefulness of rhetorical stylistics in analyzing and constructing arguments.

"A rich and rewarding textbook that shows how stylistic features make for persuasion. It provides readers with a good introduction to the study of figures in the sense of classical rhetoric."--Linguist List  
About the Author  
Jeanne Fahnestock is Professor of English at the University of Maryland. She is the author of *Rhetorical Figures in Science*, and co-author of *A Rhetoric of Argument*.
