"Thomas Couser's *Signifying Bodies* comes at a crucial moment when debates about physician assisted suicide, genetic engineering, and neo-natal screening are raising the question of what constitutes a 'life worth living' for persons with disabilities. Couser's work engages these debates by exploring the extensive number of personal narratives by or about persons with disabilities. As Couser brilliantly demonstrates through synoptic readings, these works challenge the 'preferred rhetorics' by which such narratives are usually written (triumphalist, gothic, nostalgic) while making visible the variegated nature of embodied life."---Michael Davidson, University of California, San Diego"*Signifying Bodies* shows us that life writing about disability is . . . everywhere. . . . From obituary to documentary film to ethnography to literary memoir to the law, the book casts a wide net, detailing how various written and filmed responses to disability both enact and resist conventional narrative patterns. [This] not only broadens our idea about where to look for life writing, but also demonstrates how thoroughly stereotypes about disability mediate our social and artistic languages---even when an author has (so-called) the best intentions."---Susannah B. Mintz, Skidmore College
