time to comprehend and implement. While business admins. typically have some kind of master's degree, I have found that they often lack critical knowledge on how to treat their employees and how to reduce conflict between employees, management, and within management. Current politics hardly promote social justice. This is something the social sciences (and I/O Psychologists, especially) can readily and easily provide if businesses would put aside the outdated business systems they "try" to make work. Look to innovate and create a new, employee focused system. This book provides information critical to such an innovative and needed process. It is information most current businesses desperately need, no matter what level or position the reader occupies. Learn people and society and then consider profits and politics. People drive a business. Profits will never motivate like real communication and relationships. 0 of 0 people found the following review helpful. recommended it to everyone I know 0 of 0 people found the following review helpful. Five Stars By Customer Excellent place to start, or deepen your skills, if you're working with groups

Arnold Mindell, Ph.D., shows how working with power, rank, revenge and abuse helps build sustainable communities.
