like stories more in depth. However, if you have kids who use social media it is a good book to read and discuss
appropriately with your kids. After reading this I was sitting in a hair salon with my daughter. I took a picture of a nice

looking boy from a magazine and sent it to her. I acted as if I was the boy and wanted to get to know her. After, we discussed how easy it is for someone to fake an identity using social media. She was kind of surprised. 1 of 1 people found the following review helpful. Informative By Darcy Authors provide a list of scenarios where perpetrators used social media to find their victims. Most of them used fake ads or profiles to get people to contact them and as simple as placing babysitting advertisement and waiting. It provides credible warning that one may never know whose on the other end of an ad, profile, or blog and parents must protect and teach children internet safety just as importantly as looking both ways before crossing a street. 0 of 0 people found the following review helpful. Very informative By neilorie and an interesting collection of stories. You think you know all there is to know about the internet and it's possible dangers but realize there's more than meets the eye, from this compilation. Internet safety for children should be a mandatory subject in schools...maybe it already is?

Stalkers, rapists, and murderers.... These criminals have all discovered uncharted territory through the open door of the internet, and victims are piling up in their deadly playground. Murder. Kidnapping. Cannibalism. Suicide. All of these themes can be found in this collection of true stories about killers who have used the internet to locate, lure, stalk, or exploit their victims. As you read through the case files of this book, you will learn about the shocking lives led by online predators from all around the world. These types of killers are identified as people who are motivated by a psychological factor: some murderers are triggered by anger or jealousy, others kill as a way to seek attention, and some are merely in it for the thrill of the kill. Unfortunately, sometimes the real reasons behind these murderous acts are not always known or understood. Anyone can fall victim to an online killer, even if the perpetrator is living on the other half of the earth. How can you protect yourself from such dangers? In the last chapter of the book, learn about the importance of online privacy and how to avoid sharing personal information online, a potentially dangerous and deadly act.
