**From Schaie K Warner Abeles Ronald P : Social Structures and Aging Individuals: Continuing Challenges (Springer Series on the Societal Impact on Aging)** before purchasing it in order to gage whether or not it would be

worth my time, and all praised *Social Structures and Aging Individuals: Continuing Challenges* (Springer Series on the Societal Impact on Aging):

[A] useful reference book. Readers will find themselves returning to chapters again and again... --PsycCritiques This is the 20th and final volume in the "Societal Impact on Aging" series. It focuses on what has been learned over the span of the previous volumes regarding the continuing challenges for older persons in a rapidly changing society and tries to forecast what may be the next set of issues to lie at the intersection of social structures and the individual aging process. The editors therefore invited major organizers of, and contributors to, the 19 earlier volumes to review both the accomplishments and omissions of their efforts, discuss some timely new topics, and provide guidelines for future research and theoretical explanations. The book is divided into five broad topics: health and wellbeing, including the role of religion; personality and cognition; the impact of changes in technology and the work place; issues of socio-cultural change and historical context; and the familial and societal contexts of aging.
