Deirdre Heenan, Derek Birrell : Social Work in Northern Ireland: Conflict and Change before purchasing it in order to gage whether or not it would be worth my time, and all praised Social Work in Northern Ireland: Conflict and Change:

Written in an accessible style, this book highlights the distinctive aspects of social work policy and practice in Northern Ireland. It covers the historical development of social work, explores the challenges that have arisen from delivering services both during and post conflict and addresses the new imperatives created after the devolution settlement. Exploring many major themes - including social exclusion, devolution and working across borders - the

book demonstrates how Northern Ireland's experience can provide lessons for national and international theory and practice.

This valuable analysis of social work operating in a divided society within very different organisational structures has important implications for practice elsewhere. Jeremy Harbison, Chair, NI Social Care Council 2001-2010
