Rosemary Crossley : Speechless: Facilitating Communication for People Without Voices before purchasing it in order to gage whether or not it would be worth my time, and all praised Speechless: Facilitating Communication for People Without Voices:

0 of 0 people found the following review helpful. This book, and strategy changed my experience and viewpoint ...By JennieThis book, and strategy changed my experience and viewpoint as a teacher and expanded possibilities to where I never thought they would be. Thank you Rosemary for writing this important book and for helping everyone find their voice:)0 of 0 people found the following review helpful. Five StarsBy Tom FergusonThank you3 of 3 people found the following review helpful. A writer who takes risks and asks important questionsBy Mark TwainThis book is a fantastic collection of accounts of moving, diverse personalities who all share one thing in common- the have no functional verbal speech. Rosemary, as the character who becomes involved with these very different characters, has a wonderful humorous and passionate writer's voice, making this comparable to books like Oliver Sachs' The Man Who Mistook His Wife For A Hat. You don't have to be interested in Facilitated or Augmented Communication techniques to find this book a thoroughly good read in its own right. You simply have to enjoy the inner worlds of human beings and how remarkable it is when those worlds get their first change at expression.Rosemary Crossley casts aside the taboos and tackles the serious issues, never taking herself overly seriously. She's a credit to a world that takes far fewer risks and asks far fewer important questions than she does.Read it if you dare.

The developer of Facilitated Communication, a method of helping mutes communicate using a keyboard or spelling

board, recounts her legal battles to encourage its acceptance and the stories of people who have benefited from its use. 20,000 first printing. Tour.

From Library Journal Facilitated Communication (FC) is a controversial technique for helping those who cannot speak use a communication aid. A "facilitator" assists the person without speech in using a spelling board or keyboard to create words by either pointing out letters or typing on the keyboard. Controversy centers on who is actually communicating?the facilitators or their charges. Crossley is credited with developing FC, first used in the mid-1970s with Anne McDonnell, who was severely disabled and assumed to have a mental age of several months. By presenting the stories of numerous individuals she has worked with (she runs the DEAL Center for people with severe communications disabilities in Melbourne, Australia), Crossley chronicles and defends her development and use of FC with those lacking functional communication owing to autism, brain injuries, Down syndrome, and other disorders. She details and answers criticisms, paying particular attention to the use of the technique in the United States. Recommended for special collections. ?Kate Kelly, Massachusetts General Hosp. Lib., Boston Copyright 1997 Reed Business Information, Inc.
